

MEGA REEF KIT *(130 lbs.)*

One 9-post base and shade top, fifteen screws, four Trophy Tree XL trunks, one Safe Haven XL trunk, twenty-eight 46" limbs, forty-eight 60" limbs

1. Insert trunks into post bases (as pictured below) and secure with provided self-tapping screws. Safe Haven XL trunk goes in center post base.

TIP: Note the correct orientation of the V shape.

There are NO pre-drilled holes for the self-tapping screws.

2. Insert one limb into the second V from the top of each trunk. (see diagram below). NOTE: Safe Haven XL/46" limbs, Trophy Tree XL/60" limbs.
3. Lay shade top over top of trunks and secure by inserting limbs in top row of V's on top of each trunk (see diagram below).
4. Insert limbs in the remaining V's on each trunk.
5. Place gravel, concrete block(s), or bag of concrete in base to weigh product down (not included).
