## TROPHY TREE (12 lbs.)

One 40" Trophy Tree trunk, nine 46" limbs

- 1. Position trunk upright where slits appear as "V" shapes.
- 2. Insert one limb into outer V-shape and **angle tip down slightly** as you insert into V-shape directly across trunk.
- 3. Ensure limb is fit securely through V-shapes on both sides of trunk. MossBack products allow you to create multiple limb configurations. Leave at least 4" of limb through on one side of trunk. See ideas below.
- 4. Continue inserting limbs in trunk repeating first three steps.

**Product needs weighting.** We recommend our block adapter (sold separately) to easily attach a concrete block to our single products.

Do not place in swimming or boating areas. Check your local game laws.
