

SPAWNING BED XL (15 lbs.)

One 9-post base

1. For the *Basic Spawning Bed XL Bundle*, cover the bed with gravel substrate no more than half full (not included).
2. For the *Essential* and *Ultimate Spawning Bed XL Bundles*, insert trunk into base where slits appear as “V” shapes. Attach to base with provided screws.
3. Insert limbs, remembering to angle tip down slightly as you insert into V-shape directly across trunk. Leave at least 4” of limb through one side of trunk.
4. Cover the bed with gravel substrate no more than half full (not included).
5. Place bed in 3'- 8' of water depending on your water clarity and target species.
