

LIMB SHADE 3-PACK (3 lbs.)

(Used to add additional shade to Root Wad, Trophy Tree, Safe Haven, Trophy Tree XL, Safe Haven XL, Predator Prey Combo Tree and John Godwin Signature Crappie Tower)

1. After assembling a standalone product, insert limb through the top hole on the Limb Shade with the bottom of the “V-shape” contacting the points.
2. Only push the shade five to six inches onto the limb. Place your hand behind the shade and fold the next hole to the front of the limb making a “U” shape and lining up the holes. Repeat for second fold making and upside down “U.” The shade should look like an “S” shape when completed.
3. Repeat steps 1 and 2 with remaining Limb Shades on new limbs.
