

PREDATOR PREY COMBO TREE *(23 lbs.)*

One 60" Predator Prey Combo Tree trunk, nine 46" limbs, nine 60" limbs

1. Insert nine long (60") limbs into the bottom portion of trunk:
insert one limb at a time into outer V-shape and **angle tip down slightly** as you insert into V-shape directly across trunk.
2. Insert nine short (46") limbs into the top portion of trunk.

Product needs weighting. A block adapter (sold separately) is recommended for secure placement. Concrete block is not included. Product may lean, which mimics trees in a water habitat environment. This does not affect the product's performance.
